

**Tech Oasis** is a public/private partnership founded in 1999; its mission is to build and brand Arizona as a premier technology region.

Tech Oasis is about highlighting and building upon our existing strengths and advantages, showcasing our successes, and interconnecting our efforts to build both internal synergies and external awareness.

*The value that Tech Oasis provides includes:*

**INNOVATION** - To assist entrepreneurs, universities and companies in their efforts of launching and building innovative technology-based businesses that lead to the diversification of Arizona's economy and the local economic growth of our communities.

**COLLABORATION** - To augment effective initiatives of universities, trade/professional groups, government economic development projects and tech-oriented businesses that properly lead to the long-term, build-out of Arizona's infrastructure for the technology industry.

**COMMUNICATION** - To locally, regionally, nationally and internationally ensure a consistent message of Arizona tech industry efforts, through marketing of Tech Oasis promotional tools and our monthly statewide Tech Oasis Nights.
